TEB0728 with TE0728

Overview

Board Overview

1. Barrel Jack Power Supply

- 2. XMOD JTAG Adapter
- 3. SD card holder
- 4. Reset
- 5. Boot mode Jumper
- 6. Carrier LEDs (Red, Yellow, Green) D1
- 7. Ethernet Socket
- 8. Module LEDs (Green D4, Red D8)

Power supply

Single 5V power supply with minimum current capability of 2.5A is recommended to power on the board.

| Overview 1 | Supply Voltage | Min Current | Note |
|--------------|----------------|-------------|------|
| P@wer Supply | 5 V | 2.5 A | |

DIP-Switches and Push Buttons

There is a switch (S1) which is connected to RESET signal, it resets the system entirely.

| Overview 4 | Connected to | B2B | Active Level |
|----------------|--------------|------|--------------|
| DJP Switches / | Pusb Buttons | J2-7 | Active High |

There is no DIPs on TE0728. In case of TE0790 (XMOD) usage, see DIPs mode.

Jumpers

| Overview 5 | Connected to | B2B | Note |
|------------|--------------|-------|----------------|
| J4 | Boot_R | J2-11 | Open: QSPI |
| | | | Short: SD Card |

Jumpers

LEDs

There are three user LEDs on the carrier TEB0728 which can be used for variant purposes.

| Overview 6 | Color | Connected to | B2B | Active Level | Note |
|---------------|--------|--------------|-------|--------------|----------|
| D1-A | Red | MIO48 | J2-30 | Active high | User LED |
| D1-B | Yellow | MIO49 | J2-38 | Active high | User LED |
| D1-C | Green | MIO50 | J2-36 | Active high | User LED |

Carrier LEDs

Furthermore, there are two user LEDs on module TE0728.

| Overview 8 | Color | Connected to | B2B | Active Level | Note |
|---------------|-------|----------------|-----|--------------|----------|
| D4 | Green | Bank33 pin V18 | - | Active high | User LED |
| D9 | Green | DONE_0 | | | DONE pin |

| D8 | Red | MIO7 | - | Active high | User LED | |
|----|-----|------|---|-------------|----------|--|
|----|-----|------|---|-------------|----------|--|

Module LEDs

JTAG/UART

JTAG and UART connections are available through XMOD JTAG adapter. For more information refer to TE0790.

DIP Switch on the XMOD JTAG adapter must be set like the following table.

| Overview 2 | DIP Switch | Setting |
|------------|------------|---------|
| JB1 | 1 | ON |
| | 2 | OFF |
| | 3 | OFF |
| | 4 | ON |

XMOD JTAG DIP Switch
