

Recreate the SDK project

When Xilinx SDK opens, you should:

- 1) [Set the repositories](#) for device driver of custom block used in SDK Microblaze project
- 2) Create an "Hardware Platform Specification Project" "reference-TE0300_hw_platform"
- 3) Create a "Board Support Package Project" "standalone_bsp_0"
- 4) Recreate the "Application Project" "demo"
