

Recreate the SDK project

When Xilinx SDK opens, you should:

- 1) [Set the repositories](#) for device driver of custom block used in SDK Microblaze project
- 2) [Create an "Hardware Platform Specification Project"](#) "reference-TE0300_hw_platform"
- 3) [Create a "Board Support Package Project"](#) "standalone_bsp_0"
- 4) [Recreate the "Application Project"](#) "demo"
