## FX22MB\_REG0\_STOP command

 $FX22MB_REG0_STOP = 0x04$ 

This command stops both the test started by FX22MB\_REG0\_START\_TX (0x02, read test) and FX22MB\_REG0\_START\_RX (0x03, write test).

This MicroBlaze command does not require the use of USB FX2 FW APIs SET\_INTERRUPT before and GET\_INTERRUPT after. It is instead required to send this command after the data transmission (form the USB FX2 to the host computer or from the host computer to the USB FX2) is ended. See FX22MB\_REG0\_START\_TX and FX22MB\_REG0\_START\_RX for more information.

This command writes data (12 bytes) to the requested I2C address.

Byte	Value	Description
1	0xAD	I2C_WRITE FX2 API command ID
2	0x3F	I2C Address MB_I2C_ADRESS=0x3F
3	0x0C (12)	FX2_Parameters.I2C_BYTES=0x0C Number of bytes to write (max 32)
4	0x00	-
5	0x00	-
6	0x00	-
7	0x04	MB_Commands.FX22MB_REG0_STOP Stop both the test started by FX22MB_REG0_START_TX (0x02, read test) and FX22MB_REG0_START_RX (0x03, write test)
From 8 to 64	-	Not used
