

Dewesoft C++ DLL to Trenz Electronic C# DLL

Introduction

How to write C# programs using the new DLL starting from the old DLL.

There are some major differences between the two DLLs.

feature	Dewesoft C++ DLL	Trenz Electronic C# DLL
programming language	C++	C#
architecture	standard (TE0300DLL.dll)	stacked (TE_USB_FX2_CyUSB.dll requires Cypress CyUSB.dll);
Handles	present	absent
structures	embedded	defined in Cypress CyAPI.h
parameters*	less	more
freedom*	less	more
buffer size	2 Kbyte (fixed)	4 Kbyte or more (it can be changed)

Feature of Dewesoft C++ DLL and Trenz Electronic C# DLL

Function translation

Dewesoft C++ DLL	Trenz Electronic C# DLL
HANDLE m_handle = 0;	<pre>CyUSBDevice TE_USB_FX2_USBDevice = null; USBDeviceList USBdevList = new USBDeviceList(CyConst.DEVICES_CYUSB);</pre> <p> The handles are internally managed by CyUSB.dll and there is no need to expose them to the user.</p> <p> CyUSBDevice TE_USB_FX2_USBDevice take the place of handles for C# programmers.</p>
cout << endl << TE0300_ScanCards() << endl;	<pre>int NumberOfCardAttached = TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_ScanCards(ref USBdevList); Console.WriteLine("{0}", NumberOfCardAttached);</pre>

TE0300_Open (&m_handle, 0)!=0	<p>TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_Open (ref TE_USB_FX2_USBDevice, ref USBdevList, 0) == false</p> <div style="border: 1px solid #ccc; padding: 5px;"> <p> TE_USB_FX2_Open()</p> <p>In the code, it is possible to call TE_USB_FX2_Open() where TE0300_Open() is used.</p> </div> <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p> TE_USB_FX2_Open() as SelectCard()</p> <p>TE_USB_FX2_Open(TE_USB_FX2_USBDevice, USBdevList, x) acts more as a SelectCard() function because the list of USB devices is already created in USBdevList. TE_USB_FX2_USBDevice is the selected device number x (0 in this case).</p> </div>
TE0300_Open (&m_handle, 1)!=0	TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_Open (ref TE_USB_FX2_USBDevice, ref USBdevList, 1) == false
TE0300_Close (&m_handle);	<p>TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_Close (ref USBdevListToDispose);</p> <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;"> <p>In the code, it is not recommended to call TE_USB_FX2_Close() where TE0300_Close() is used. This function differs from its homonym of the previous TE0300DLL.dll in that it does not close a Handle but disposes (erases) all USB devices in the list USBdevList.</p> <p>The reason of this behavior is due to the CyUSB.dll as explained by Cypress document CyUSB.NET.pdf, pages 132-133 and pages 139-140: "You should never invoke the Dispose() method of a USBDevice directly. Rather, the appropriate technique is to call the Dispose() method of the USBDeviceList object that contains the USBDevice objects".</p> </div>
TE0300_SendCommand (handle, cmd, cmd_length, reply, &reply_length, timeout)	TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_SendCommand (ref TE_USB_FX2_USBDevice, ref cmd, ref cmd_length, ref reply, ref reply_length, TIMEOUT_MS)

Translation example between the DLLs

Dewesoft C++ DLL	Trenz Electronic C# DLL
void ResetFX2FifoStatus(HANDLE handle) {	static void ResetFX2FifoStatus (CyUSBDevice TE_USB_FX2_USBDevice) {
	if (TE_USB_FX2_USBDevice == null) { Console.WriteLine("Error,no device is selected"); return; }
cout << endl << "Resetting all FIFOs" << endl;	Console.WriteLine("Resetting all FIFOs");
byte cmd[64], reply[64]; int cmd_length = 64; int reply_length = 64;	byte[] cmd = new byte[64]; byte[] reply = new byte[64]; int cmd_length = 64; int reply_length = 64;
	uint TIMEOUT_MS = 100;
cmd[0] = 0xA4; cmd[1] = 0;//RESET all FIFOs	cmd[0] = (byte)FX2_Commands.RESET_FIFO_STATUS; cmd[1] = 0; //RESET all FIFOs

<pre>if (TE0300_SendCommand (handle, cmd, cmd_length, reply, &reply_length, 1000)) cout << "Error" << endl;</pre>	<pre>if (TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_SendCommand (ref TE_USB_FX2_USBDevice, ref cmd, ref cmd_length, ref reply, ref reply_length, TIMEOUT_MS) == false) Console.WriteLine("Error Send Command Reset all fifos");</pre>
<pre>cmd[0] = 0xA0;//command INITIALIZE cmd[1] = 1;//FIFO mode</pre>	<pre>cmd[0] = (byte)FX2_Commands.INITALIZE; cmd[1] = 1;//FIFO mode</pre>
<pre>if (TE0300_SendCommand (handle, cmd, cmd_length, reply, &reply_length, 1000)) cout << "Error" << endl; }</pre>	<pre>if (TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_SendCommand (ref TE_USB_FX2_USBDevice, ref cmd, ref cmd_length, ref reply, ref reply_length, TIMEOUT_MS) == false) Console.WriteLine("Error Switch Mode Fifo Mode"); }</pre>

Reset FX2 FIFO Status example

Dewesoft C++ DLL	Trenz Electronic C# DLL
<pre>void ReadData(unsigned int handle)</pre>	<pre>static void ReadData (CyUSBDevice TE_USB_FX2_USBDevice, int BUFFER_SIZE, uint TIMEOUT_MS)</pre>
	<pre>if (TE_USB_FX2_USBDevice == null) { Console.WriteLine("Error,no device is selected"); return; }</pre>
<pre>int packetlen = RX_PACKET_LEN; unsigned int packets = 1200; byte * data; data = new byte [RX_PACKET_LEN*packets]; unsigned int total_cnt = 0; unsigned int errors = 0;</pre>	<pre>int packetlen = RX_PACKET_LEN; int packets = 1200; byte[] data = new byte[packetlen*packets]; byte[] buffer = new byte[packetlen]; int total_cnt = 0; int errors = 0;</pre>
	<pre>int PI_EP6 = 6; bool bResultXfer = false; test_cnt = 0; total_cnt = 0;</pre>
<pre>ResetFX2FifoStatus(handle); //starts test SendFPGACommand(handle, FX22MB_REG0_START_TX);</pre>	<pre>ResetFX2FifoStatus(TE_USB_FX2_USBDevice); //starts test SendFPGACommand(ref TE_USB_FX2_USBDevice, MB_Commands.FX22MB_REG0_START_TX, TIMEOUT_MS);</pre>
<pre>//StopWatch start ElapsedTime.Start();</pre>	<pre>//StopWatch start Stopwatch stopWatch = new Stopwatch(); stopWatch.Start();</pre>
<pre>for (unsigned int i = 0; i < packets; i++) { packetlen = RX_PACKET_LEN;</pre>	<pre>for (int i = 0; i < packets; i++) { packetlen = RX_PACKET_LEN;</pre>
<pre> if (TE0300_GetData(handle, data+total_cnt, &packetlen, PI_EP6,TIMEOUT_MS)) { </pre>	<pre> bResultXfer = TE_USB_FX2.TE_USB_FX2.TE_USB_FX2_GetData (ref TE_USB_FX2_USBDevice, ref buffer, ref packetlen, PI_EP6, TIMEOUT_MS,BUFFER_SIZE); Buffer.BlockCopy(buffer,0, data, total_cnt, packetlen); if (bResultXfer == false) {</pre>

<pre> cout << "Error Get Data" << endl; errors++; break; } total_cnt += packetlen; } //StopWatch timer TheElapsedTime = ElapsedTime.Stop(false); //stops test SendFPGACmd(handle,FX2MB_REG0_STOP); delete data; } </pre>	<pre> Console.WriteLine("Error Get Data"); errors++; break; } total_cnt += packetlen; } //StopWatch timer stopWatch.Stop(); TimeSpan ts = stopWatch.Elapsed; //stops test SendFPGACmd(ref TE_USB_FX2_USBDevice, MB_Commands.FX2MB_REG0_STOP, TIMEOUT_MS); //Garbage Collector } </pre>
--	--

Read data example

Dewesoft C++ DLL	Trenz Electronic C# DLL
<pre> void WriteData(unsigned int handle) { </pre>	<pre> static void WriteData (CyUSBDevice TE_USB_FX2_USBDevice, int BUFFER_SIZE, uint TIMEOUT_MS) { </pre>
