# Debug

JTAG Access Vivado

Start Vivado or Vivado Labtools, and choose Hardware Manager.

Vivado Labtools screen PCB Revision 2, DDR Voltage is measured 1.35V for DDR3L, Digilent is displayed in JTAG Cable properties.
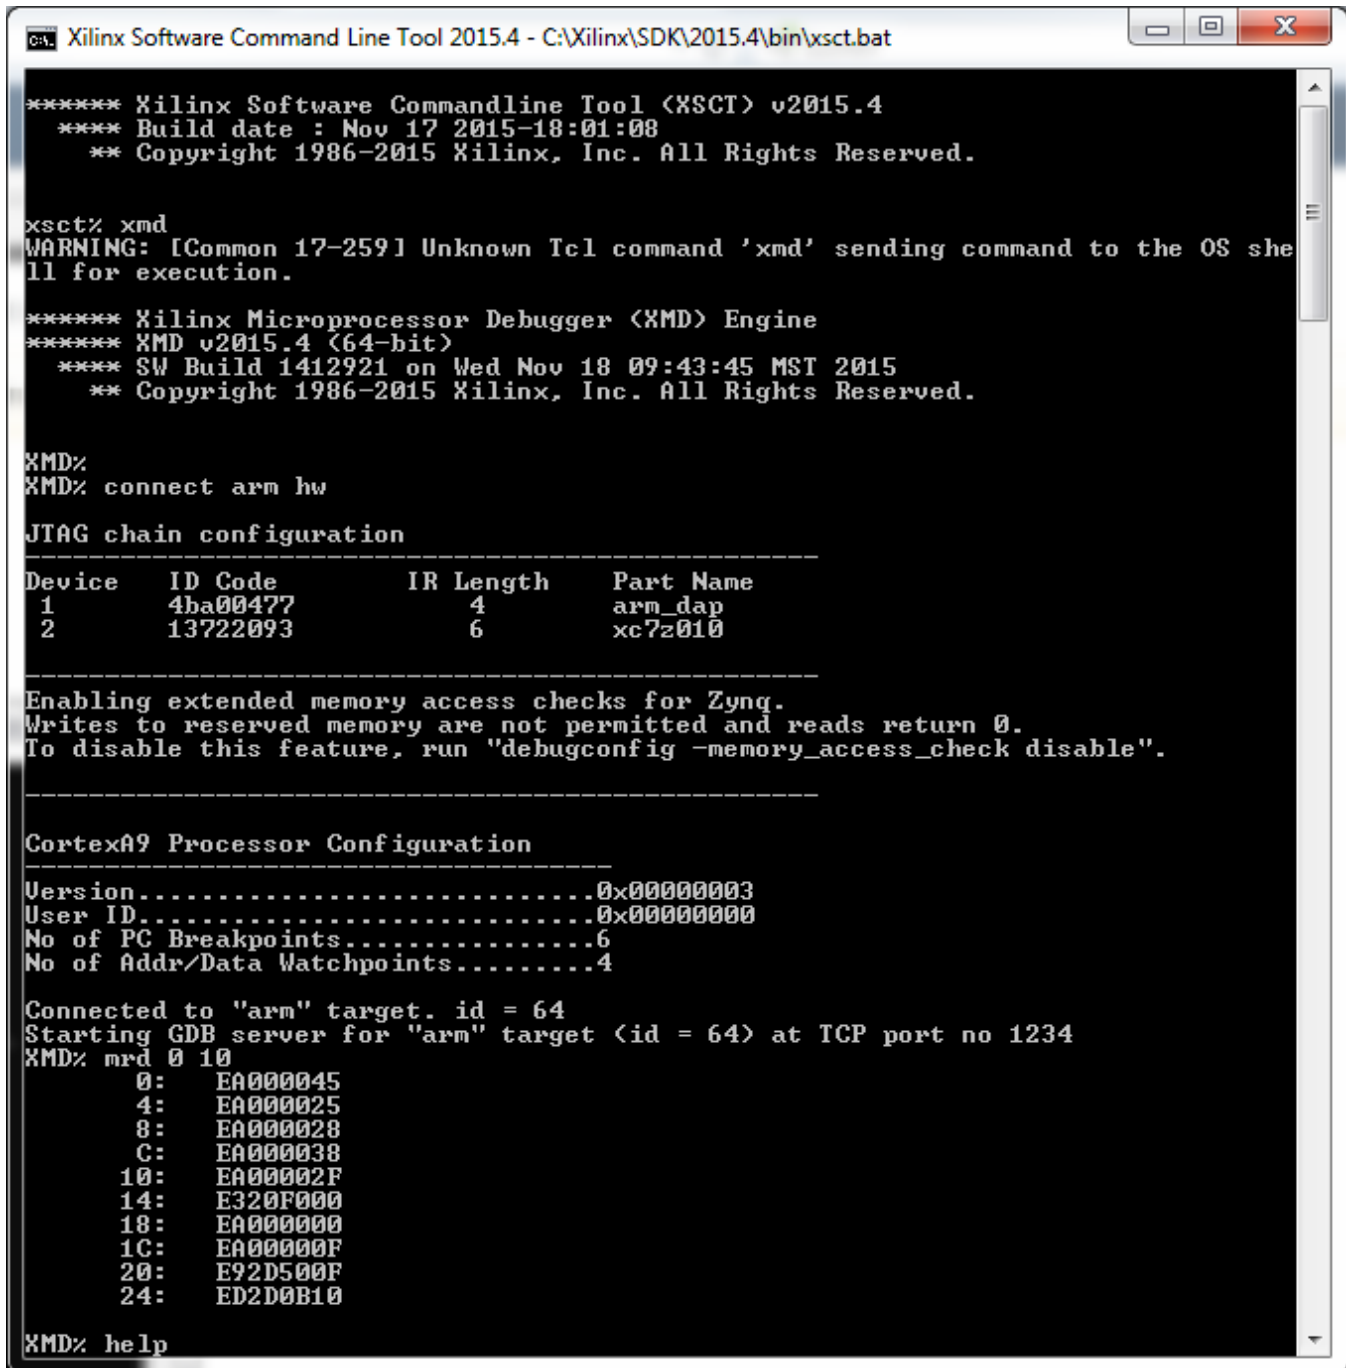

⚠ If Linux has been booted it may happen that XADC monitor readback is disabled, in that case all the temperature and voltage readings would be invalid.

JTAG Access SDK

Console/XMD

Launch Xilinx SDK prompt, then start XMD and connect to ARM DAP

```
Xilinx Software Command Line Tool 2015.4 - C:\Xilinx\SDK\2015.4\bin\xsct.bat

JTAG chain configuration
--------------------------------------------------
Device    ID Code        IR Length     Part Name
1         4ba00477           4          arm_dap
2         13722093           6          xc7z010

--------------------------------------------------
Enabling extended memory access checks for Zynq.
Writes to reserved memory are not permitted and reads return 0.
To disable this feature, run "debugconfig -memory_access_check disable".

--------------------------------------------------
