

# Design Examples

Complete reference design are available on the [Trenz Electronic Download Area](#) in the sub-folder <SOM>/Reference\_Design/<Vivado Version>/<Design Name>. Reference Designs can be created only with predefined Vivado Version.

## Basic Content:

- Board Part files
- Vivado Design (will be generated via script)
- PetaLinux template project (for most Zynq [UltraScale+ and 7-Series] modules and some MicroBlaze designs)
- Prebuilt and configuration files images

The detailed content of these reference designs are described on the download page.
