Main Components

TE0835 main components

1. Xilinx UltraScale+ RFSoc, U1
2. 8Gb DDR4 SDRAM, U2,U3,U5,U9
3. Voltage Regulators, U4,U6,U7
4. User Red LEDs, D2...5
5. Error/Status Red LEDs, D6...7
6. Programmable Glock Generator, U15
7. Lattice MachXO2 CPLD, U31
8. Dual SPI Flash, U24-U25
9. USB2.0 Transceiver, U11
10. Pin Header 3x1, J3 (not Soldered)
11. Green LED, D1
12. Gigabit Ethernet Transceiver, U20
13. EEPROM, U23
14. B2B Connectors, J1
15. B2B Connectors, J2

Initial Delivery State

Storage device name	Content	Notes
2x SPI Flash	Not Programmed	
System Controller CPLD	Programmed	
EEPROM	Not Programmed	
4x DDR4 SDRAM	Not Programmed	
Programmable Clock Generator	Not Programmed	

Initial delivery state of programmable devices on the module

Configuration Signals

Configuration must be set through CPLD,U31 by setting MODE0...3 signals.

MODE[3:0]	Boot Mode	Note
0000	PS_JTAG	Refer to CPLD Page
0001	Quad SPI Flash	Refer to CPLD Page
0101	SD Card	Refer to CPLD Page

Boot process.

The reset pin is active low.

Signal	B2B	I/O	Note
RESETN	J1-36	Input	Pulled up to 3.3V_CPLD

Reset process.

Signals, Interfaces and Pins

Board to Board (B2B) I/Os

FPGA bank number and number of I/O signals connected to the B2B connector:

FPGA Bank	B2B Connector	Number of I/Os	Voltage Level	Notes
Bank 500	J1	12x Single Ended	1.8V	MIO14...25
Bank 501	J1	20x Single Ended	1.8V	MIO26...51
Bank 505	J1	18x Single Ended, 9x Differential pairs	0.85V	EXT_CLKIN_PSMGT, RX/TX0...3
Bank 128	J1	2x Differential CLK Input, 8x Differential Transceiver	--	B128_CLK, RX /TX0...3
Bank 129	J1	2x Differential CLK Input 8x Differential Transceiver	--	B129_CLK, RX /TX0...3
Bank 65	J2	24x Single Ended, 12x Differential pairs	1.8V	HP Bank
Bank 88	J2	16x Single Ended, 8x Differential pairs	3.3V	HD Bank
ADC	J2	16x Single Ended, 8x Differential pairs 4x Differential Clocks	Variable	

DAC	J2	16x Single Ended, 8x Differential pairs 3x Differential Clocks	Variable	
-----	----	--	----------	--

General PL I/O to B2B connectors information

JTAG Interface

JTAG access to the Xilinx UltraScale+ MPSoC is through B2B connector JM1. JTAG signals routed directly through the CPLD to FPGA. Access between CPLD and FPGA can be multiplexed via JTAGEN (logical one for CPLD, logical zero for FPGA) on B2B. When the CPLD_JTAGEN is 0 or off, it provides FPGA access and when it is 1 or ON, it provides CPLD access.

JTAG Signal	B2B Connector
JTAG_TMS	J1-24
JTAG_TDI	J1-20
JTAG_TDO	J1-18
JTAG_TCK	J1-22

JTAG pins connection

MIO Pins

MIO Pin	Connected to	B2B	Notes
MIO0...12	SPI FLash, U24-U25	-	Dual SPI FLash
MIO13	LED Green, D1	-	3.3V_CPLD

Quad SPI interface MIOs and pins

System Controller CPLD

The System Controller CPLD (U31) is provided by Lattice Semiconductor LCMXO2-460HC. The CPLD provides JTAG routing, boot mode, User IOs, LEDs, firmware and power management access. For more information please refer to the [TE0835 CPLD](#) page.

Schematic/Pin	Connected to	Description	Note

PG_RF_DAC	Voltage Regulators, U10	DAC Power Good Status	Pulled Down

USB2.0 interface connections and pins

USB2.0

The TE0835 is equipped with a USB2.0, U11.

U11 Pin	Schematic	Connected to	Notes
RESETB	USB0_RST	FPGA Bank 501, U1	
VDDIO	1.8V	1.8V	
CPEN	USB0_CPE	B2B, J1	
VBUS	USB0_VBUS	B2B, J1	
ID	USB0_ID	B2B, J1	
DP	USB0_D_P	B2B, J1	
DM	USB0_D_N	B2B, J1	
REFCLK	USB_CLK	Oschillator, U12	
STP	USB0_STP	FPGA Bank 502, U1	
NXT	USB0_NXT	FPGA Bank 502, U1	
DIR	USB0_DIR	FPGA Bank 502, U1	
CLKOUT	USB_CLK	Oschillator, U12	
DATA0...7	USB0_DATA0...8	FPGA Bank 502, U1	

USB2.0 interface connections and pins

Ethernet

The module TE0835 is equipped with a Gigabit Ethernet Transceiver, U20.

U20 Pin	Signal Name	Connected to	Signal Description	Note
MDIO	ETH_MDIO	FPGA Bank 502, U1	Data Management	
MDC	ETH_MDC	FPGA Bank 502, U1	Data Management clock reference for the serial interface	
TX_CLK	ETH_TXCK	FPGA Bank 502, U1	Transmit Clock	
TX_CTRL	ETH_TXCTL	FPGA Bank 502, U1	Transmit Control	
TXD0...3	ETH_TXD0...3	FPGA Bank 502, U1	Transmit Data	
RX_CLK	ETH_RXCK	FPGA Bank 502, U1	Receive Clock	
RX_CTRL	ETH_RXCTL	FPGA Bank 502, U1	Receive Control	
RXD0...3	ETH_RXD0...3	FPGA Bank 502, U1	Receive Data	
RESETn	ETH_RST	FPGA Bank 501, U1	Ethernet reset, Active low.	
XTAL_IN	ETH_XTAL_IN	Oscillator, U21	Reference Clock	
MDIO...3	PHY_MDIO...3	B2B, J1	Media Dependent Interface 0...3	
LED0...1	PHY_LED0...1	B2B, J1	LED output	
LED/INT	PHY_LED2	B2B, J1	LED interrupt	

Ethernet connections

EEPROM

The module TE0835 has an EEPROM IC (U23) connected to PSMIO FPGA Bank 501.

MIO Pin	Schematic	U23 Pin	Notes
MIO32	MIO32_I2C1_SCL	SCL	
MIO33	MIO33_I2C1_SDA	SDA	

I2C EEPROM interface MIOs and pins

MIO Pin	I2C Address	Designator	Notes
MIO32...33	0xA1	U23	

I2C address for EEPROM

LEDs

Designator	Color	Connected to	Active Level	Note
D1	Green	MIO13	Active High	3.3V CPLD
D2...5	Red	DBG_LE D0...3	Active Low	User LED

D6	Red	ERR_OUT	Active High	
D7	Red	ERR_ST ATUS	Active High	

On-board LEDs

DDR4 SDRAM

The TE0835 SoM has 4x 1 Gigabyte volatile DDR4 SDRAM IC for storing user application code and data.

- Part number: K4A8G165WB
- Supply voltage: 1.2 V
- Speed: 2400 Mbps
- Temperature: -40 ~ 95 °C

Clock Sources

Designator	Description	Frequency	Note
U14, U21	MEMS Oscillator	25MHz	
U22	MEMS Oscillator	33.33 MHz	
Y1	Crystal Oscillator	54 MHz	
U12	MEMS Oscillator	52MHz	
U15	Programmable Clock Generator	Variable	

Oscillators

Programmable Clock Generator

There is a Silicon Labs I²C programmable clock generator on-board (U10) in order to generate reference clocks for the module. Programming can be done using I²C via PIN header J3. The I²C Address is 0x69.

U15 Pin	Signal	Connected to	Direction	Note
IN0	IN0_P	Oscillator, U14	Input	
IN1	-	N.C	-	
IN2	EXT_CLK_IN1	B2B,J2	Input	
IN3	-	N.C		
nRST	PLL_RSTN	FPGA Bank 65, U1	Input	
SCL	MIO32_I2C1_SCL	Pin Header, J3	Input	I2C
SDA	MIO33_I2C1_SDA	Pin Header, J3	Input	I2C
OUT0	CLKC	B2B,J2	Output	Differential Clock
OUT1	CLKB	B2B,J2	Output	Differential Clock
OUT2	CLKA	B2B,J2	Output	Differential Clock

OUT3	CLKD	B2B,J2	Output	Differential Clock
OUT4	CLKE	B2B,J2	Output	Differential Clock
OUT5	CLKF	B2B,J2	Output	Differential Clock
OUT6	B128_C LK0	FPGA Bank 128, U1	Output	
OUT7	B129_C LK0	FPGA Bank 129, U1	Output	
OUT8	CLK8	FPGA Bank 65, U1	Output	
OUT9	PSMGT _100MHZ	FPGA Bank 505, U1	Output	
OUT9A	CLK0A_ 100MHZ	B2B, J1	Output	

Programmable Clock Generator Inputs and Outputs

Power and Power-On Sequence

Power Supply

Power supply with minimum current capability of 2.5A for system startup is recommended.

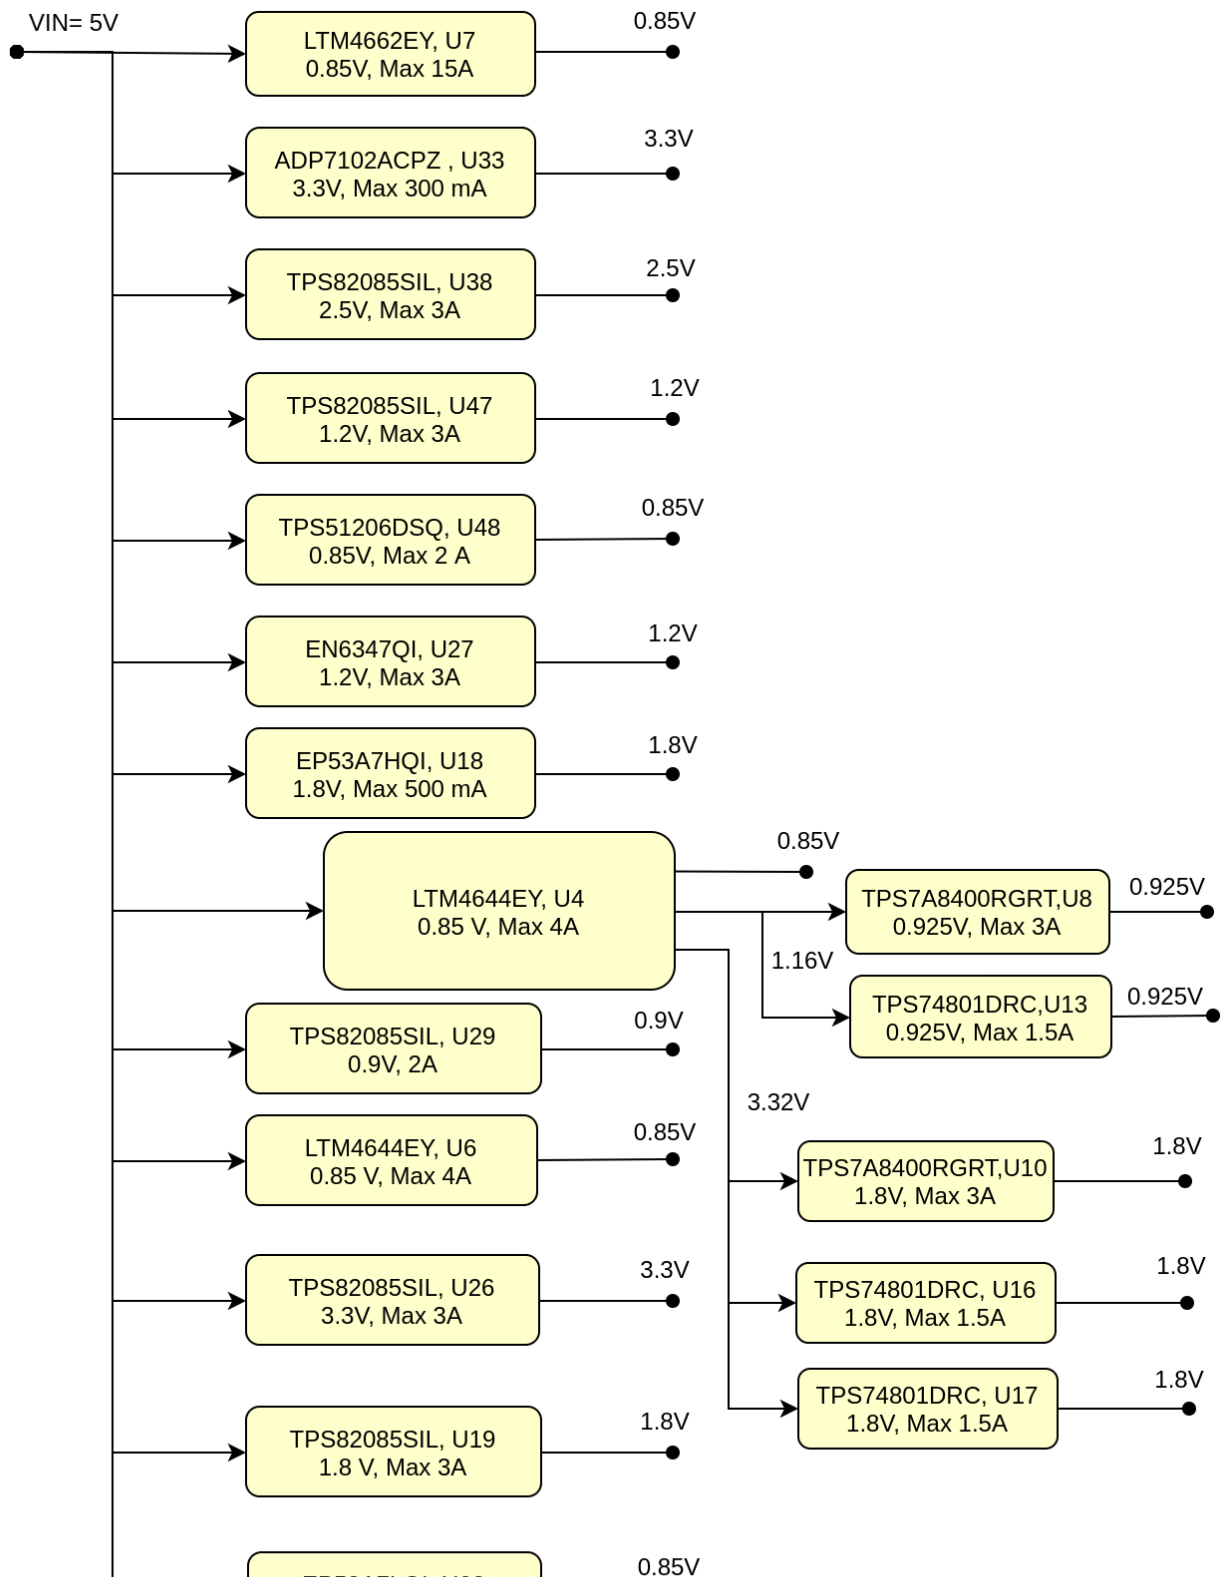

Power Consumption

Power Input Pin	Typical Current
VIN (5V)	TBD*

Power Consumption

* TBD - To Be Determined

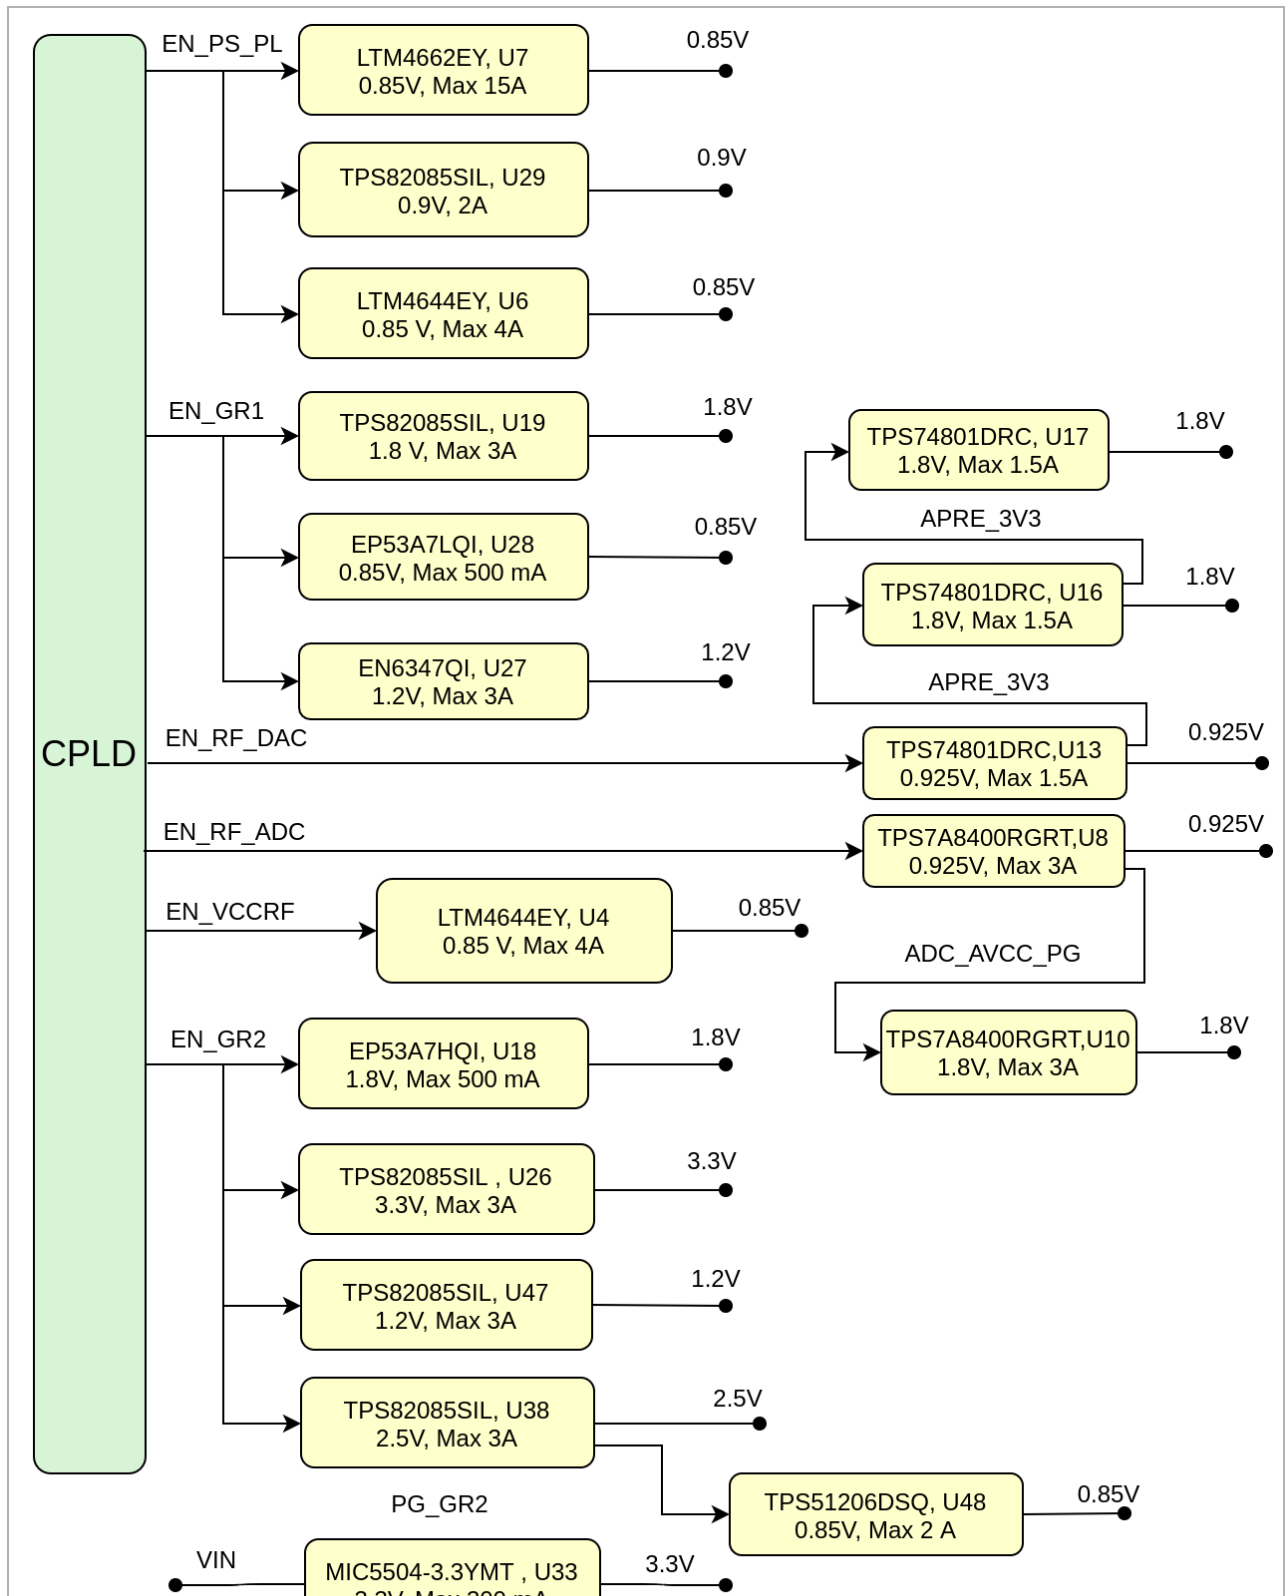

Power Distribution Dependencies

Power Distribution

Power-On Sequence

3.3V, I_{max} 300 mA

Power Sequency

Power Rails

Power Rail Name	B2B J1 Pin	B2B J2 Pin	Direction	Notes
VIN	1,2,3,4,5,6,8	-	Input	
PSBATT	14	-	Input	
3.3V_CPLD	16	-	Output	

Module power rails.

Bank Voltages

Bank	Schematic Name	Voltage	Notes
Bank 65 HP	VCCO_65	1.8V	
Bank 503 PSCONFIG	VCCO_PSIO3_503	1.8V	
Bank 88 HD	VCCO_88	3.3V	
Bank 128 GTY	MGTAVCC	0.9V	
Bank 129 GTY	MGTAVCC	0.9V	
Bank 500 PSMIO	VCCO_PSIO0_500	1.8V	
Bank 501 PSMIO	VCCO_PSIO0_501	1.8V	
Bank 502	VCCO_PSIO0_502	1.8V	
Bank 504 PSDDR	VCCO_PSDDR_504	1.2V	
Bank 505 PSGTR	PS_MGTRAVCC	0.85V	

Zynq SoC bank voltages.

Board to Board Connectors

Unable to render {include}

Document Warranty

The material contained in this document is provided “as is” and is subject to being changed at any time without notice. Trenz Electronic does not warrant the accuracy and completeness of the materials in this document. Further, to the maximum extent permitted by applicable law, Trenz Electronic disclaims all warranties, either express or implied, with regard to this document and any information contained herein, including but not limited to the implied warranties of merchantability, fitness for a particular purpose or non infringement of intellectual property. Trenz Electronic shall not be liable for errors or for incidental or consequential damages in connection with the furnishing, use, or performance of this document or of any information contained herein.

Limitation of Liability

In no event will Trenz Electronic, its suppliers, or other third parties mentioned in this document be liable for any damages whatsoever (including, without limitation, those resulting from lost profits, lost data or business interruption) arising out of the use, inability to use, or the results of use of this document, any documents linked to this document, or the materials or information contained at any or all such documents. If your use of the materials or information from this document results in the need for servicing, repair or correction of equipment or data, you assume all costs thereof.

Copyright Notice

No part of this manual may be reproduced in any form or by any means (including electronic storage and retrieval or translation into a foreign language) without prior agreement and written consent from Trenz Electronic.

Technology Licenses

The hardware / firmware / software described in this document are furnished under a license and may be used /modified / copied only in accordance with the terms of such license.

Environmental Protection

To confront directly with the responsibility toward the environment, the global community and eventually also oneself. Such a resolution should be integral part not only of everybody's life. Also enterprises shall be conscious of their social responsibility and contribute to the preservation of our common living space. That is why Trenz Electronic invests in the protection of our Environment.

REACH, RoHS and WEEE

REACH

Trenz Electronic is a manufacturer and a distributor of electronic products. It is therefore a so called downstream user in the sense of [REACH](#). The products we supply to you are solely non-chemical products (goods). Moreover and under normal and reasonably foreseeable circumstances of application, the goods supplied to you shall not release any substance. For that, Trenz Electronic is obliged to neither register nor to provide safety data sheet. According to present knowledge and to best of our knowledge, no [SVHC \(Substances of Very High Concern\) on the Candidate List](#) are contained in our products. Furthermore, we will immediately and unsolicited inform our customers in compliance with REACH - Article 33 if any substance present in our goods (above a concentration of 0,1 % weight by weight) will be classified as SVHC by the [European Chemicals Agency \(ECHA\)](#).

RoHS

Trenz Electronic GmbH herewith declares that all its products are developed, manufactured and distributed RoHS compliant.

WEEE

Information for users within the European Union in accordance with Directive 2002/96/EC of the European Parliament and of the Council of 27 January 2003 on waste electrical and electronic equipment (WEEE).

Users of electrical and electronic equipment in private households are required not to dispose of waste electrical and electronic equipment as unsorted municipal waste and to collect such waste electrical and electronic equipment separately. By the 13 August 2005, Member States shall have ensured that systems are set up allowing final holders and distributors to return waste electrical and electronic equipment at least free of charge. Member States shall ensure the availability and accessibility of the necessary collection facilities. Separate collection is the precondition to ensure specific treatment and recycling of waste electrical and electronic equipment and is necessary to achieve the chosen level of protection of human health and the environment in the European Union. Consumers have to actively contribute to the success of such collection and the return of waste electrical and electronic equipment. Presence of hazardous substances in electrical and electronic equipment results in potential effects on the environment and human health. The symbol consisting of the crossed-out wheeled bin indicates separate collection for waste electrical and electronic equipment.

Trenz Electronic is registered under WEEE-Reg.-Nr. DE97922676.
